

SHUBHAM SAWANT

Software Developer

Parel, Mumbai, Maharashtra | +91-8369146238 | sawantshubham736@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFILE

Full-stack developer with hands-on MERN experience across React, Redux, Node.js, and Express. Comfortable building complete web applications end to end, with a growing foundation in Python, Machine Learning, and SQL. Looking for a Software Developer role where I can apply and expand these skills.

SKILLS

Languages: JavaScript (ES6+), Python, TypeScript (in progress), C++ (DSA), C

Frontend: ReactJS, Redux Toolkit, HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express.js, REST APIs

Databases: MongoDB, MySQL, PostgreSQL (basics)

Machine Learning & NLP: Regression, Classification (KNN, Naive Bayes, Decision Trees, SVM), Model Evaluation, Cross-Validation, Hyperparameter Tuning, Ensemble Learning (Bagging, Boosting, XGBoost), Clustering (K-Means, DBSCAN), PCA, NLP fundamentals (BoW, N-Grams, TF-IDF)

Tools: Git, GitHub, AWS (basics), Tableau, Power BI

EDUCATION

B.Tech — Shah and Anchor Kutchhi Engineering College

Mumbai | CGPA: 7.17

12th (HSC) — M.D. College of Commerce, Science, Arts

Mumbai | 65% (2022)

PROJECTS

Gesture Recognition Based Interactive Gameplay | *TensorFlow.js, Handpose, Face-API.js, WebRTC*

- Built a dual-modality gesture gaming platform (facial expressions via Face-API.js 68-point landmarks; hand gestures via TensorFlow.js 21-point skeleton), fully browser-native with zero installation.
- Engineered a real-time ML pipeline achieving 30–50 ms end-to-end latency at 60 FPS without GPU, with all biometric inference running client-side for privacy by design.

DevLink | *MERN Stack (MongoDB, Express.js, ReactJS, Node.js, Socket.io)*

- Developed a full-stack developer networking platform, similar to Tinder, where users connect based on skills and interests.
- Engineered a RESTful backend API using Node.js and Express.js to manage user profiles, authentication, and a connection request system (send, ignore, accept, reject).
- Implemented a real-time chat feature using Socket.io, enabling instant communication once two developers match.

StreamFusion | *React, Redux Toolkit, Tailwind CSS, Firebase, Google Gemini API, TMDB API*

- Built a Netflix-style UI for browsing movies, with an AI-powered recommendation engine using the Google Gemini API and TMDB data.
- Focused on content discovery and a fully responsive layout, using Firebase for backend data handling.

myTube | *React, Redux Toolkit, Tailwind CSS, YouTube Data API, Node.js*

- Built a YouTube clone with video browsing, search, and a live chat simulation, replicating core YouTube functionality.
- Used Redux Toolkit for optimized state management and modern frontend practices across the app.

CURRENTLY LEARNING

- Data Structures & Algorithms (C++) and SQL (PostgreSQL) through daily, consistent practice.
- TypeScript, to bring stronger type-safety to React and Node.js projects.
